CAD Manager Software Updates

Open CAD Manager Version 10.5 is now available

We are pleased to announce Release 10.5 of Open CAD Manager. We have been working hard to improve our product and keep current with new CAD software releases. We hope this new release will help you enjoy your experience with Open CAD Manager even more.

What's new?

- Major performance speed and search improvements for the mass import tool
- Added multi-select for preparing components for CAD systems
- Ability to load references in the original version they were stored with in the assembly
- Updated styling for CAD Manager
- Improved support for CAD files imported outside of CAD Manager
- Improved document lock handling and visual representation
- Updated support for latest CAD systems
 - Autodesk Inventor 2023
 - Autodesk AutoCAD 2023
 - Autodesk Revit 2023
 - SolidWorks 2022
 - Solid Edge 2022

You can download the upgrade from our app store at <https://support.opendomain.com>. Please contact us if you need login information.

Thank you for your interest in Open CAD Manager.

Coming Soon...

CAD Manager for Cloud

Preparations are underway for CAD Manager 11. This version makes use of web services based on the popular RESTapi standard for communication with CAD Manager back-end services. This allows web-only operation and enables migration to the cloud.
